RFID MOBILE SOLUTION FOR THE MANAGEMENT OF SPARE PARTS

NexCap® Mobile Assets Tracking is a complete mobile solution for the management of spare parts with RFID in industrial environments.

Equipped with passive UHF RFID tags, your spare parts are identified, inventoried and located in real time.

Through the NexCap® Software Platform, all information associated with your spare parts (location, state, quantity, etc.) are available in real-time and archived automatically.

You have a complete control and traceability of your spare parts movement ensuring gains in safety and productivity.

BENEFITS

- **Quality**: global vision and real-time availability of spare parts
- **Productivity**: precise and automatic inventory of spare parts storage area
- **Location**: Instant geolocation of spare parts
- **Safety**: state, location and quantity monitoring of each spare parts

**NexCap® products range:**

SOFTWARE FEATURES

Unique Identification
Identified through a UHF RFID tag, each spare part to control and each location is unique.
In case of misidentification or spare part improper location, the user is immediately alerted thanks to its mobile reader (PDA).

Geolocalisation
NexCap® solution allows real-time location of spare parts (what, where) and in this way ensure the availability of each spare part in case of failure or maintenance, for example.
NexCap® improves the efficiency of spare parts management.

Automatic Inventory
NexCap® solution gives back a real time global vision of spare parts storage area state and allows to classify spare parts according to their category / location / state and to obtain their features informations.

Traceability and records
NexCap® allows logging of all movements (borrowings, returns, maintenance sending, etc.) and ensures full traceability of spare parts contributing to an improvement of the activity quality.

NEXCAP® WEB

- Real time automatic inventory of storage areas
- Spare parts location
- Alerts reporting
- Maintenance records and traceability
- Inspection reports
- Data export
- Automatic stock tracking
- Inventory reports
- Administration (creation, modification, deletion)

OUR APPLICATIONS

- Containers
- Fire equipment
- Tools
- Lifting equipment
- Security equipment
