

NexCap®

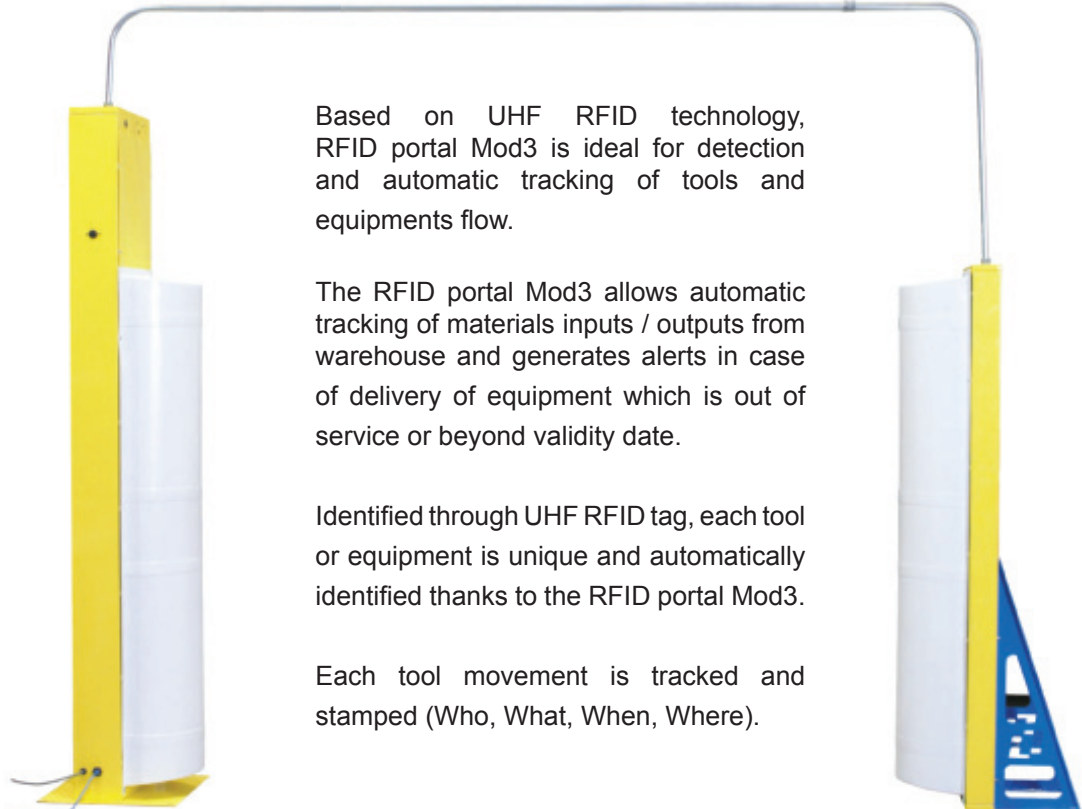

The management of assets in warehouses (tools, spare parts, etc.) is a major issue in the industry from their inventory to the monitoring of their deliverances.

An approximate management of these assets can generate a significant loss of productivity but also impacts in terms of safety: time borrowings / returns, delivery of materials beyond the validity period, inventory and calibration dates tracking, etc.

APPLICATIONS

- Logistic flow monitoring
- Tools tracking
- Documents / People flow management
- Stock management
- Materials borrows / return management

RFID PORTAL MOD3

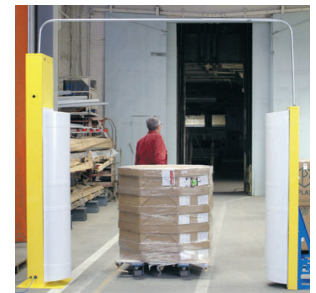

Based on UHF RFID technology, RFID portal Mod3 is ideal for detection and automatic tracking of tools and equipments flow.

The RFID portal Mod3 allows automatic tracking of materials inputs / outputs from warehouse and generates alerts in case of delivery of equipment which is out of service or beyond validity date.

Identified through UHF RFID tag, each tool or equipment is unique and automatically identified thanks to the RFID portal Mod3.

Each tool movement is tracked and stamped (Who, What, When, Where).

BENEFITS

- **Quality:** automatic assets flow management
- **Productivity:** reduction of time during assets borrowings / returns
- **Regulatory:** traceability Who/What/When/Where
- **Safety:** automatic alerts on assets out of service or beyond validity date

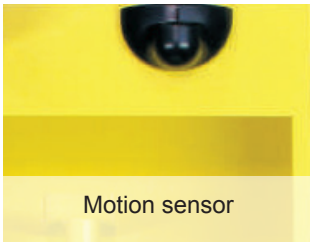

Nexess Smart RFID Solutions:

CARACTERISTICS

Motion sensor

Visual alert

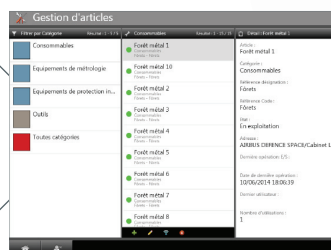

Swiveling antenna

Mode	Stand Alone
Antennas	4 to 8
Server Connection	Ethernet / Wifi (option)
Dimensions (cm)	Master: L: 50,8, H: 198,1, P: 40,6 Base: L: 50,8, P: 60,9 Slave: L: 50,8, H: 198,1, P: 33 Base: L: 50,8, P: 10,1 Customizable dimensions (option)
Weight (kg)	34 / 29
Software	NexCap® Web platform (remote)
Features	Ethernet connector (RJ45) Power supply 220 V. White ABS impact resistant cover Swiveling antenna support (depending on antenna model) Reader support (depending on reader model) Sound / visual alerts (option) Motion sensor (option) Screen allowing inputs / outputs equipment display (option) RFID equipment supply (option)
Services	Installation and configuration

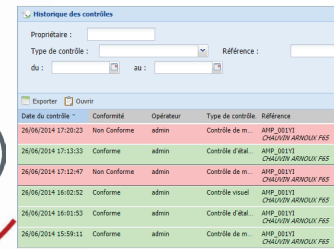

SOFTWARE FEATURES

Borrowing list
Inputs (Who, What, When)
Outputs (Who, What, When)

Alerts
Material beyond validity date
Material out of service
